

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

IN placing before the public the First Book of the Series the author has endeavored to present music which shall assist in the best technical and artistic training possible to young children. The material consists of songs with some pretensions to artistic form, which are designed for rote singing, besides a large number of the simplest melodies, which will help to improve the intonation and perfect the rhythmic sense of the children, besides serving as material for reading and writing music. Some of these have been composed for the book—more have been gleaned from every source open to the assiduous seeker. The children's song-literature of many nations has been drawn upon, and folk-tunes as well as less easy songs by eminent composers have been included. The latter are, however, all children's songs, and very few alterations or adaptations are to be found in melodies or texts. Care has been taken, where translation was necessary, to keep the spirit of the original, and the contributed poetry, as well as selected matter, will be found to be fresh and child-like.

It has been remembered that as singing is one of the most spontaneous forms of expression in child-hood, music which shall appeal to young singers must itself be direct, simple, and attract-

ive. The educative value of any song-book depends upon its adaptation to the singers' needs. This is true alike of the artistic, poetic and technical content of the song, and it is hoped that the présent collection will be found to follow the line of the young child's interests as well as to help in making him musically independent.

PART I

THE LITTLE FIDDLER

Words from the German

FRANZ LACHNER

mf Allegro vivace

1. I would like a fid - dle, yes, I'd love it!
2. I would like a fid - dle, yes, I'd love it!

Just a lit - tle bow and fid - dle brown,
When I played my jol - ly, jol - ly tunes,

Ev'r - y day I'd play a tune —
Neigh - bor, chil - dren, old dog Dash —

Three or four, a doz - en soon, And
They'd come run - ning quick as flash, And

laugh - ing, and sing - ing we'd skip to and fro,

Fid - dle did - dle dum, dum, Fid - dle did - dle do,

Fid - dle did - dle dum dum dum do.

PETER, PETER, PUMPKIN-EATER
